# Definition

## Behavioral Health Integration

- Care provided to individuals **of all ages** their families and caregivers in a patient centered medical home by licensed primary care providers, behavioral health clinicians, and other care team members working together to address one or more of the following:
  - Mental illness
  - Substance use disorders
  - Health behaviors that contribute to chronic illness
  - Life stressors and crises
  - Developmental risks and conditions
  - Stress-related physical symptoms
  - Preventative care, and
  - Ineffective patterns of health care utilization.

# Key Elements

## National Standards

- AHRQ
- Oregon PCPC

## Local Standards

- UW AIMS Center
- Qualis Health

1. Behavioral Health Clinician is an Integrated Team Member
2. Access to Psychiatry Services
3. Access to Behavioral Health as a Routine Part of Care
4. Operational Systems and Workflows to Support Population-Based Care
5. Accessibility and Sharing of Patient Information
6. Evidence-Based Treatments
7. Data for Quality Improvement
