# LAND & LABOR ACKNOWLEDGEMENT

The Northwest MHTTC acknowledges the Native and Indigenous peoples who are tied to this land through history, legends, and culture since time immemorial, and whose lands were forcibly taken. This acknowledgment is a commitment to show respect, build relationships, learn and remember tribal history and sovereignty, and work for justice in these communities.

We also acknowledge that like most modern-day U.S. institutions, the University of Washington benefits from the unaddressed legacy of stolen labor and slavery, which is at the foundation of this nation and its vast and inequitable wealth. We recognize our debt to exploited workers past and present whose labor was and continues to be stolen through unjust practices.

# MHTTC

Mental Health Technology Transfer Center Network  
Funded by Substance Abuse and Mental Health Services Administration

## MHTTC Network

## OUR GOALS

Support mental health-related  
EBPs and best practices.

Heighten awareness,  
knowledge, and skills

Foster alliances and address  
diversity of training needs

Share **FREE**, publicly  
available training and TA.

**NETWORK AREA OF FOCUS:** Evidence-based practices (EBPs) for psychosis

Including CBT for psychosis (CBTp) & Assertive Community Treatment (ACT)

## ADDITIONAL TRAINING TOPICS

Integrated Care ~ Peer Support ~ Leadership ~ Co-occurring Substance Use Disorders  
Provider Well-being ~ Suicide Prevention ~ Equity & Inclusion ~ Families ~ Trauma-Informed  
Addressing Stigma ~ Culturally Responsive ~ Crisis Work ~ Grief & Loss

*PRIORITIZING EQUITY, DIVERSITY, INCLUSION & PROVIDER WELL-BEING*

*This presentation is supported by the Northwest Mental Health Technology Transfer Center under a cooperative agreement by grant SM 081721 from the Department of Health and Human Services, Substance Abuse and Mental Health Services Administration.*

*At the time of this presentation, Miriam Delphin-Rittmon served as SAMHSA Assistant Secretary. The opinions expressed herein are the views of the speakers, and do not reflect the official position of the Department of Health and Human Services (DHHS), or SAMHSA. No official support or endorsement of DHHS, SAMHSA, for the opinions described in this presentation is intended or should be inferred.*

A stylized network diagram with black circles and lines, surrounded by colorful geometric shapes like triangles, circles, and a sun. The diagram features a central cluster of three large circles, each containing a smaller circle, connected by lines. These are further connected to several smaller circles. The background is white with various colorful geometric shapes: a green triangle in the top left, a blue circle in the top right, a yellow circle in the middle left, a yellow sun-like shape in the bottom left, and a green L-shaped line in the bottom right.

# Learning Objectives & Aims

---

## Examine

Examine implementing  
a new practice

## Learn

Learn how to adapt  
trainings

## Anticipate

Anticipate barriers and  
facilitators

## Discuss

Discuss practical  
strategies

# WHAT BRINGS YOU HERE TODAY?

---

# PROJECT OVERVIEW

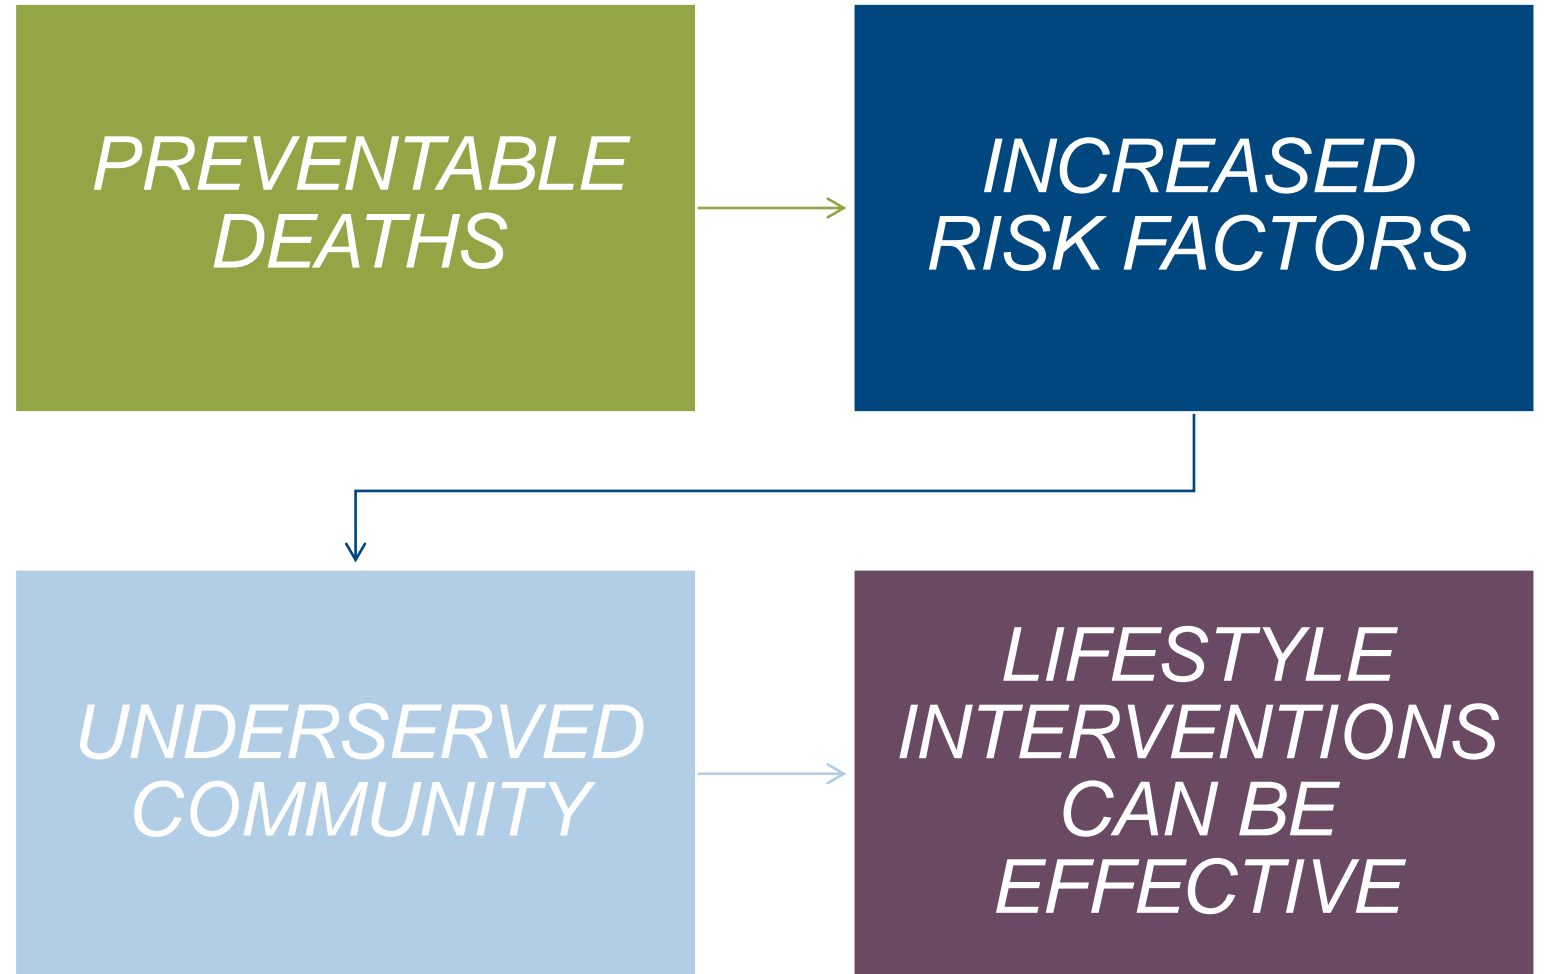

An aerial photograph of a winding asphalt road that curves through a lush, green landscape. The road is bordered by dense evergreen forests on one side and open, grassy fields on the other. The road's path is clearly visible as it snakes through the terrain.

**LET'S TAKE A JOURNEY!**

# Why the STRIDE Program was created

 KAISER PERMANENTE®  
**Center for Health Research**

# What is the STRIDE program?

- Lifestyle intervention for people with serious mental health issues
  - Weekly group meetings (6 mo)
  - Monthly maintenance meetings (6 mo)
- Small changes made over time
- Provide tools and information to help participants make their own choices
- Group leaders provide support and help with problem-solving

# **Lifestyle Intervention Helps People Taking Antipsychotic Medications Lose Weight and Reduce Diabetes Risk**

*Press Release: Sep 15, 2014 -- American Journal of Psychiatry*

**People with serious mental illnesses already at higher risk for obesity; medications that control their symptoms often lead to additional weight gain.**

- *200 people in study (half intervention, half control group)*
- *All classified as overweight or obese, and taking antipsychotic medications for serious mental illness*

## **OUTCOMES for intervention group at end of year-long study:**

- lost weight & kept it off
- more than twice as likely to have normal fasting glucose levels
- 1/3 the rate of medical hospitalizations compared to control group

Collaborate with STRIDE Researchers & Trainers

Train a group of providers at a BH agency

Implement STRIDE model in real life!

# ARE WE READY?

---

# IMPLEMENTING PRACTICE CHANGE

Northwest (HHS Region 10)

MHTTC

Mental Health Technology Transfer Center Network

Funded by Substance Abuse and Mental Health Services Administration

# Why should we care about implementation quality?

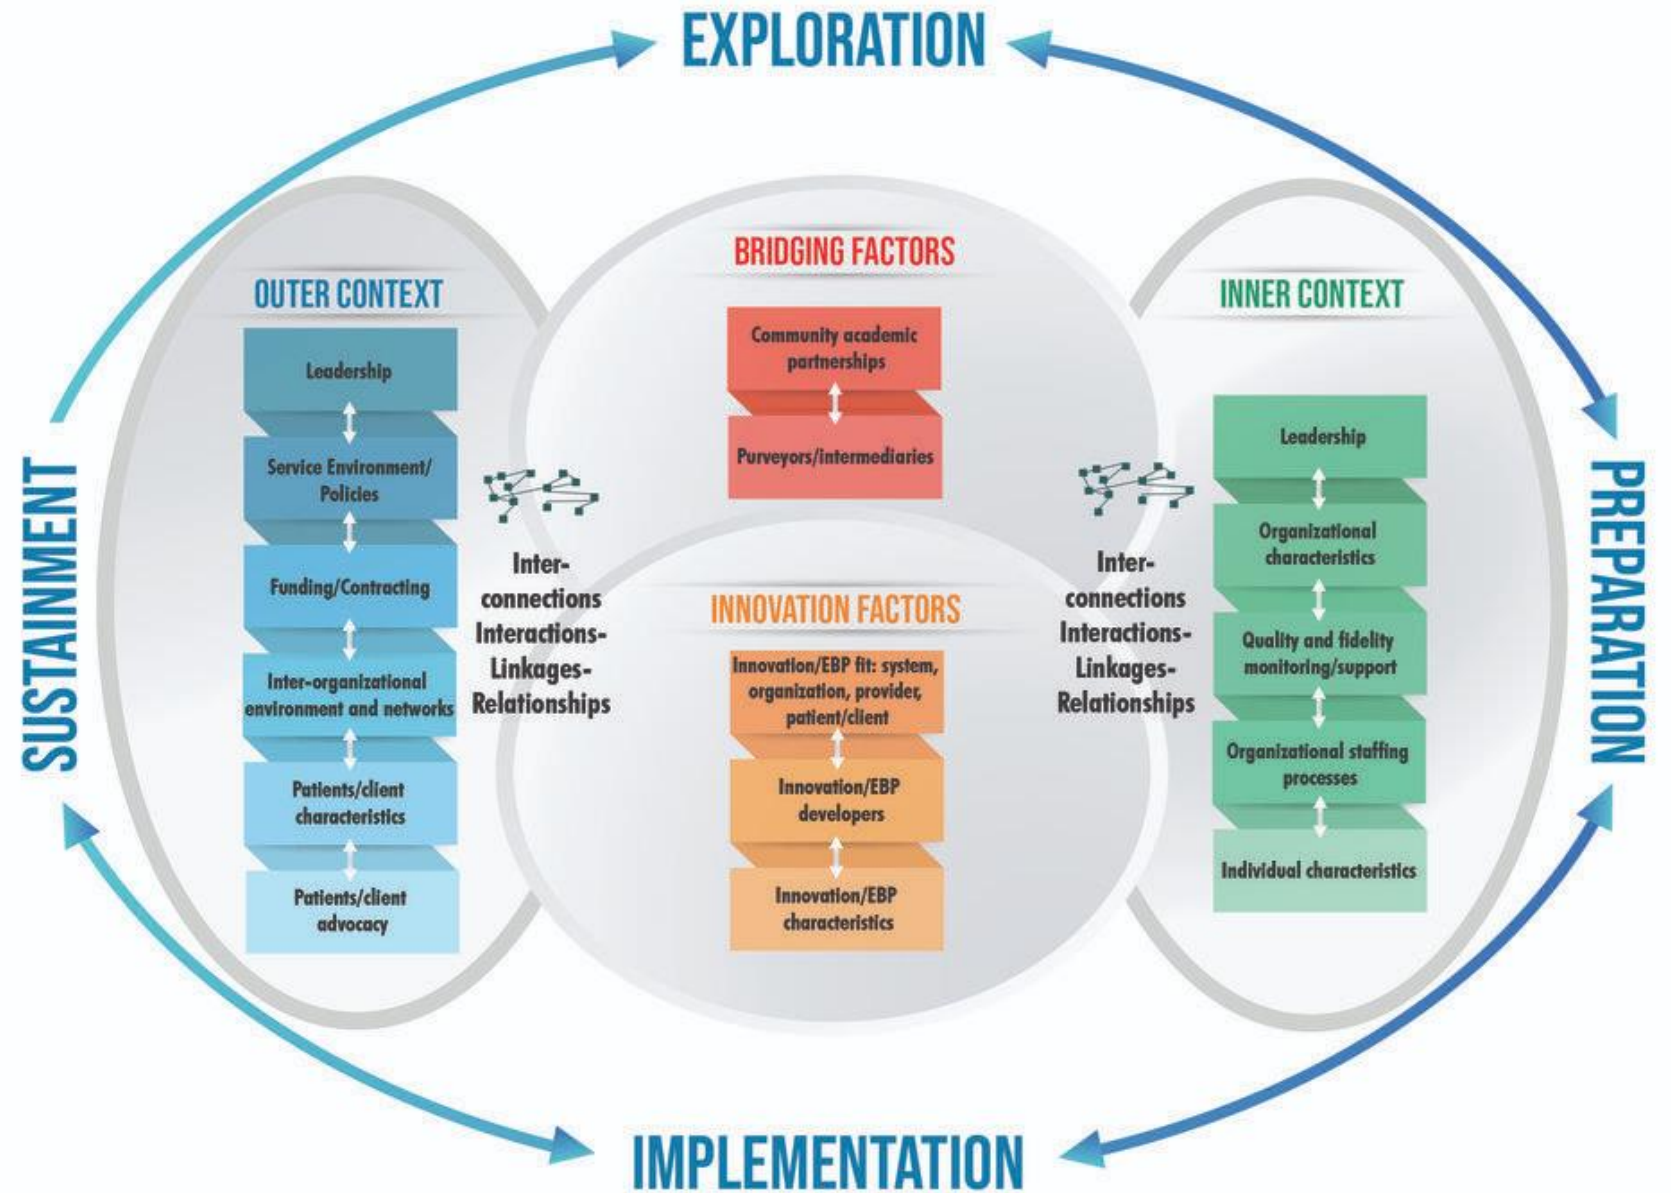

Average effect sizes (Hedges' g) across select outcomes

\* Average fidelity subsample demonstrated adequate adherence to Wraparound practice elements across most Wraparound Fidelity Index subscales.

\*\*Note: Only a single study assessed each individual outcome in either the average or below average fidelity subsamples

The EPIS model helps organize the many factors that influence implementation quality

# Implementation cannot be separated from context

At the simplest level, we can think of three levels of context:

- Individuals
- Organizations
- Systems

We see many barriers and facilitators to implementation within each of these settings

We can learn more about the  
impact of context from the  
fictional world of

**MISTER  
ROGERS'  
NEIGHBORHOOD®**

Northwest (HHS Region 10)

MHTTC

Mental Health Technology Transfer Center Network

Funded by Substance Abuse and Mental Health Services Administration

# Individuals

At the individual level, Mr. Rogers is surrounded by friendly neighbors who are committed to helping children learn and gain positive experiences

Northwest (HHS Region 10)

MHTTC

Mental Health Technology Transfer Center Network

Funded by Substance Abuse and Mental Health Services Administration

The individuals within Mr. Rogers' neighborhood are embedded within a cozy house that includes a creative world of make-believe that is filled with numerous resources including puppets, props, and educational materials

## Inner Settings

# Outer Settings

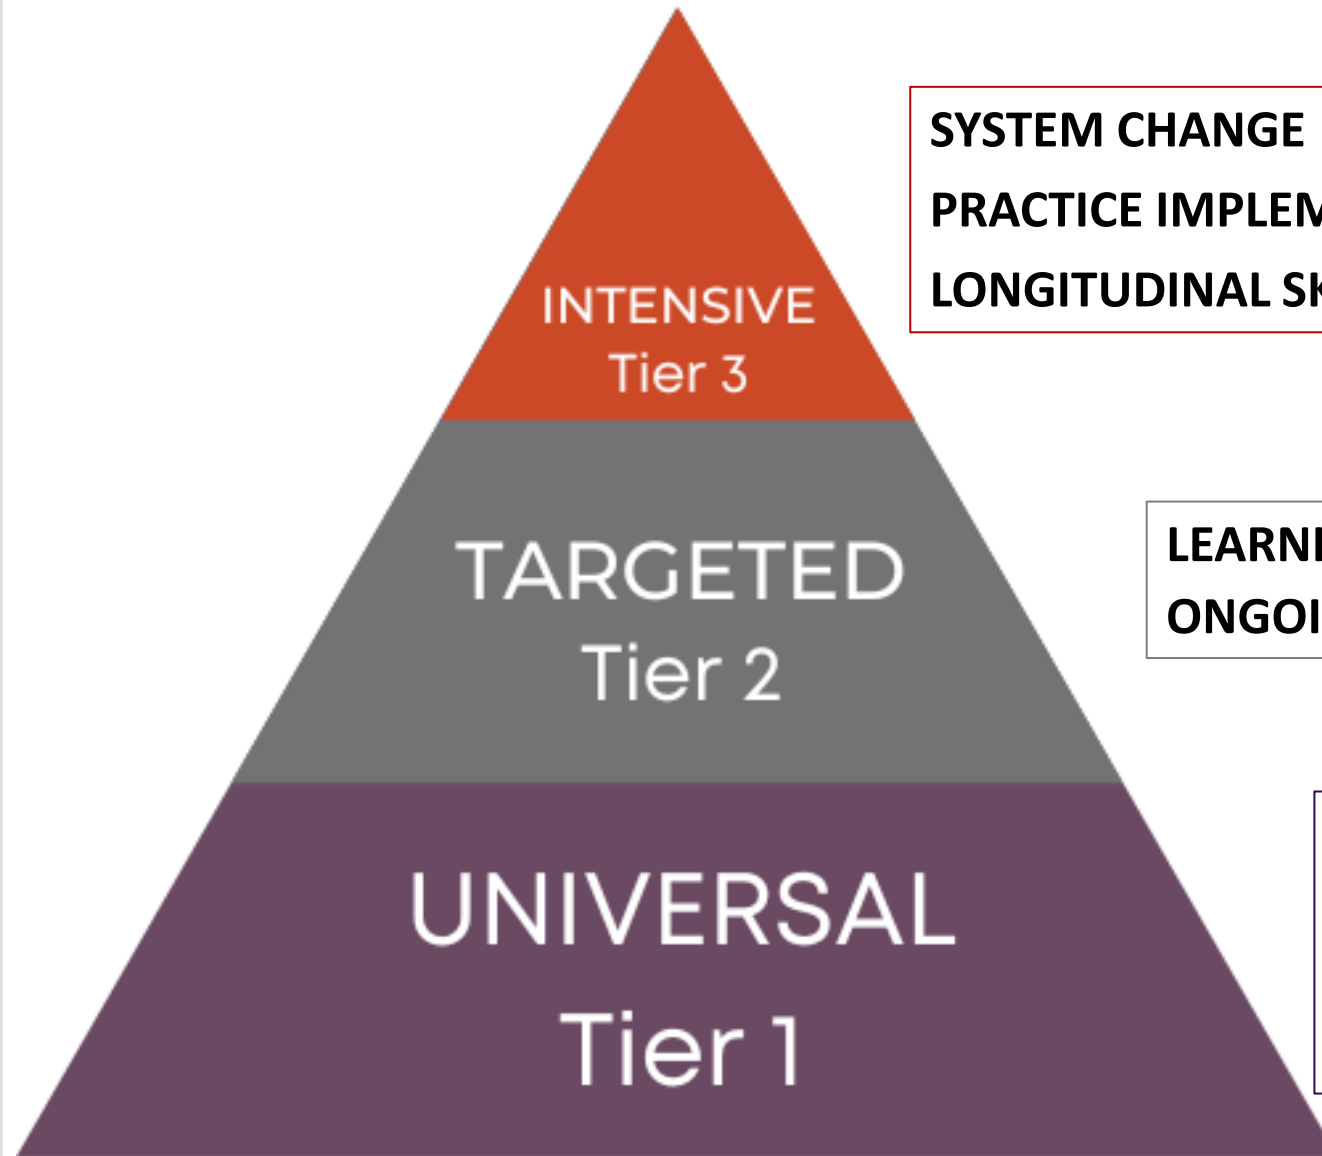

Mr. Rogers' house is embedded within a resource-filled community that includes specialty shops, museums, a library, a post-office, and a bakery, among many other community assets. The community appears safe and provides a supportive environment that helps enable Mr. Rogers' efforts to support young people.

# How is context similar across Mr. Rogers' neighborhood and EBPs?

	Mr. Rogers' Neighborhood:	EBPs:
Individuals	Friendly neighbors <ul style="list-style-type: none"><li>• Mr. Rogers</li><li>• Mr. and Mrs. McFeely</li><li>• Lady Aberlin</li><li>• Officer Clemmons</li></ul>	Behavioral health professionals: <ul style="list-style-type: none"><li>• Clinicians</li><li>• Supervisors</li><li>• Administrators</li><li>• Staff</li></ul>
Inner Settings	Mr. Rogers' house: <ul style="list-style-type: none"><li>• Living room</li><li>• Land of make-believe</li><li>• Culture, values, climate</li></ul>	Provider agencies: <ul style="list-style-type: none"><li>• Resources</li><li>• Organizational culture, values</li><li>• Leadership</li></ul>
Outer Settings	Mr. Roger's neighborhood <ul style="list-style-type: none"><li>• Stores</li><li>• Museums</li><li>• Parks, safe streets, etc.</li></ul>	Systems-level factors, including: <ul style="list-style-type: none"><li>• Policies</li><li>• Financing structures</li><li>• Government priorities</li></ul>

# STRIDE ILLUSTRATION

---

*EPIS & STRIDE*

# The Northwest MHTTC followed the EPIS stages in its support of STRIDE implementation

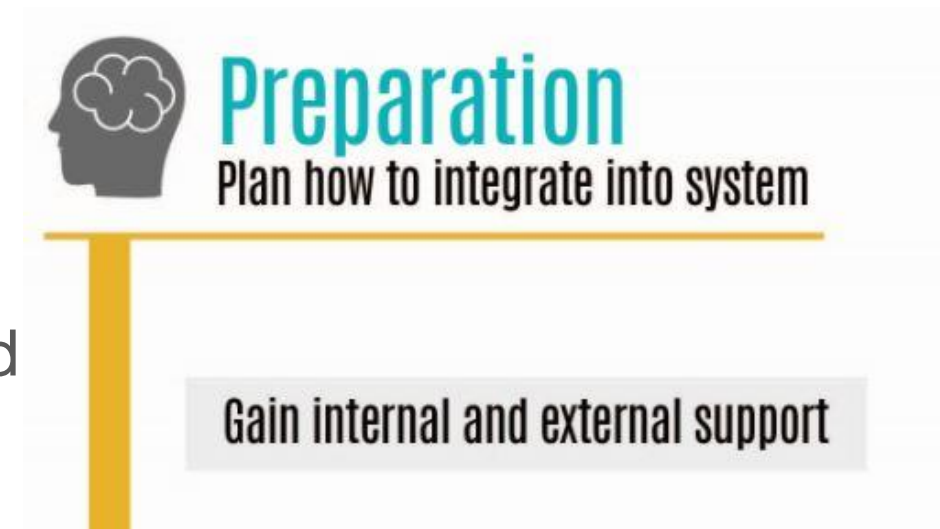

# Exploration stage: Is STRIDE the right intervention?

- **Organizational consultation meetings** were held in March and June 2021 to review requirements for implementation
  - Explored **if the intervention fit** with organizational needs and overall vision
  - Our partners included:
    - A newly granted Certified Community Behavioral Health Clinic (CCBHC)
    - KPCHR developers of the STRIDE intervention

# Preparation phase: Planning and implementing workforce training to support STRIDE implementation

- **Planning meetings** to develop an implementation blueprint and timeline
- **Educational meetings** to introduce STRIDE to stakeholders at clinical sites
- **Educational materials developed** and delivered in collaboration with subject matter experts (SMEs):
  - 30-minute online introduction to the topic
  - Live virtual training was conducted over two days in September 2021

# Implementation stage: Supporting STRIDE group facilitators during implementation

- One of the developers of STRIDE provided **ongoing consultation** to support implementation:
  - Meetings to reinforce clinical skills and competence
  - Weekly meetings for first month, then bi-weekly for 6 months
- **Consultation calls** designed to troubleshoot challenges and guide adaptations to the intervention

# Sustainment stage: Continued support designed to maintain STRIDE over time

- After the 6-month implementation phase, **monthly calls were continued** to provide ongoing support
  - Continue problem-solving
  - Brainstorm ways to promote the program to clinicians and potential participants
  - Support content changes, and transitions in frequency of meetings of STRIDE groups over time

---

# STRIDE ILLUSTRATION

---

*HOW DID IT GO?*

# We encountered numerous contextual barriers and facilitators across all EPIS stages

Contextual level	Barriers	Facilitators
Outer setting	<ul style="list-style-type: none"><li>• COVID-19 pandemic surge</li></ul>	<ul style="list-style-type: none"><li>• Medicaid focus on integrated care</li></ul>
Inner setting	<ul style="list-style-type: none"><li>• Funding necessitated rushed launch</li><li>• Open staff positions</li><li>• Competing org demands</li><li>• No protocols for referrals</li><li>• Staff turnover</li></ul>	<ul style="list-style-type: none"><li>• Buy-in from org leaders</li><li>• Healthy lifestyle emphasized at org level</li><li>• Grant funding</li><li>• Data tracking tools</li><li>• Enrollment targets established</li></ul>
Individual	<ul style="list-style-type: none"><li>• Challenges following manualized curriculum</li><li>• Inconsistent attendance at coaching calls</li></ul>	<ul style="list-style-type: none"><li>• Staff engagement and interest</li></ul>
Intervention	<ul style="list-style-type: none"><li>• More time-intensive than other group interventions</li></ul>	<ul style="list-style-type: none"><li>• Structured curriculum</li><li>• Engaging sessions</li></ul>

# Responses to select barriers were varied:

Contextual level	Barriers addressed	Responses
Outer setting	<ul style="list-style-type: none"><li>• Pandemic surge</li></ul>	<ul style="list-style-type: none"><li>• Curriculum was adapted to online/hybrid format</li></ul>
Inner setting	<ul style="list-style-type: none"><li>• Staffing</li><li>• Lack of participant referrals</li></ul>	<ul style="list-style-type: none"><li>• Began STRIDE implementation with a single facilitator</li><li>• Started STRIDE with participants from an existing wellness group</li></ul>
Individual	<ul style="list-style-type: none"><li>• Time constraints</li></ul>	<ul style="list-style-type: none"><li>• Some STRIDE session topics were skipped or carried over to future sessions</li></ul>
Intervention	<ul style="list-style-type: none"><li>• Length of curriculum</li></ul>	<ul style="list-style-type: none"><li>• STRIDE sessions were launched as open enrollment rather than following cohorts</li></ul>

# Reflections

- *SETTING OUR INTENTION*
- *ASSESSING OUR IMPACT*
- *BEING ACCOUNTABLE*

# Results from post-event survey indicate that the STRIDE training was well-received

Perceptions of STRIDE training (N = 9)

Confidence in providing diet and exercise counseling (N = 9)

Satisfaction with STRIDE training (N = 9)

Distribution of Quiz Scores following STRIDE primer (N = 397)

# What are ways we can better support implementation of practice change?

## Examples of outer-context **facilitators**:

- Available funding
- Political priority
- Public demand

## Examples of organization-level **facilitators**:

- Innovative organizational culture
- Supportive leadership
- Organizational resources

## Examples of individual-level **facilitators**:

- Motivated workforce
- Skilled practitioners
